## What is Tokenization?

- Digitalization of rights (ownership, usage time, equity, services)
- Physical and Non-Physical Assets -> "Digital Units" (Token)
- Usually backed with real values
  - FTs (fungible token: fractionalizes assets to multiple units)
  - NFTs (non-fungible token: one unique token per asset)
- Liquidity
- Flexible usage
- Security and Transparency
- Investment opportunities
- Access for everyone, everywhere

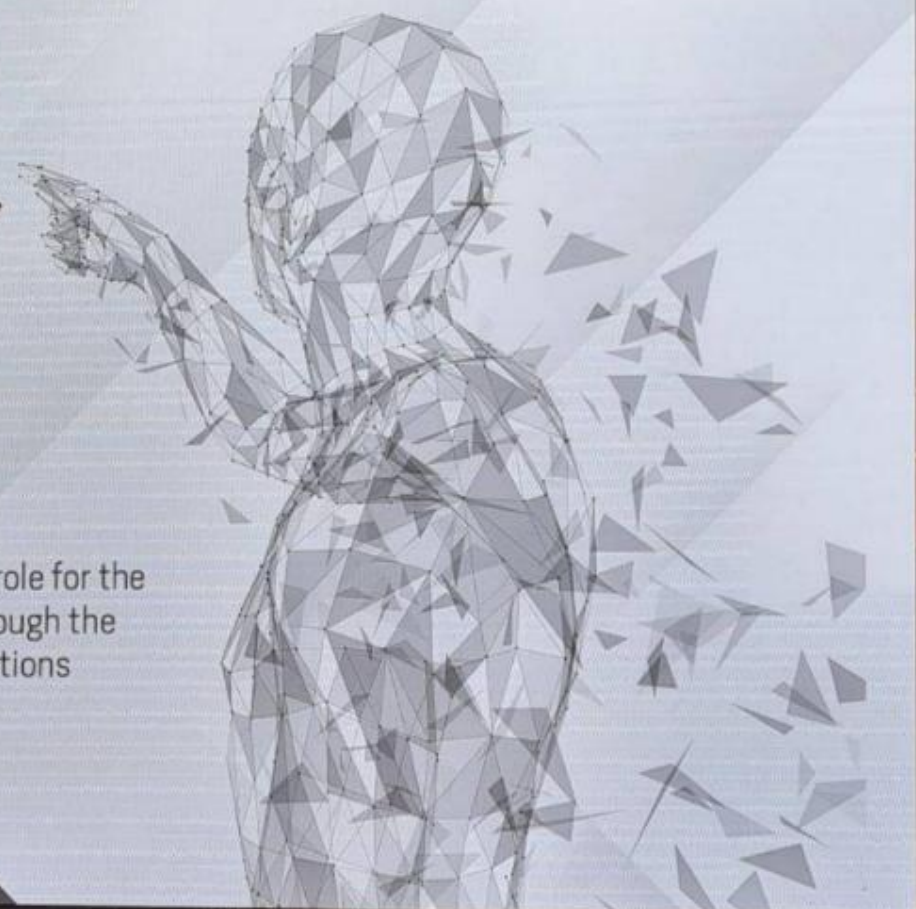

## Digitize The World

**ZENIQ's goal is to trade assets  
just as affordably, secure and quickly over  
the internet as information is exchanged.**

The tokenization of assets play an important role for the  
ZENIQ community today and in the future through the  
growth of business opportunities and transactions

## Tokenization using the ZENIQ Blockchain

- Flexibility
- Transparency
